Skills

Tools & Technologies: React, TypeScript, Node.js, JavaScript, GraphQL, Webpack, Next.js, PHP, Git, Tailwind, Python

Methodologies: Accessibility-First, Component-Driven Projects, CI/CD Actions, Technical Mentorship, Agile Methodologies

Professional Experience

Senior Frontend Developer | EverCommerce

July 2021 - Present

SaaS company delivering innovative, data-driven marketing solutions through scalable, user-focused web applications. Collaborate across teams to build performant interfaces that enhance client engagement and campaign success.

- **API Integration & Development:** Integrated REST and GraphQL APIs to create seamless data flow between frontend interfaces and backend systems.
- **Modern Frontend Development:** Deliver interactive SPAs using React, Vue, and Javascript, ensuring responsive, accessible user experiences.
- **Analytics-Driven Decision Making:** Implement and maintain analytics tracking across applications to surface actionable insights, validate assumptions, and guide iterative improvements.
- **Design-to-Development Execution:** Translate Figma designs into high-fidelity, production-ready interfaces, ensuring visual accuracy, responsiveness, and alignment with design systems.
- **Motion-Driven UX Enhancements:** Apply Framer Motion and GSAP to create purposeful animations that improve usability, reduce cognitive load, and elevate overall interface quality.
- **Data-Driven Improvements:** Conduct A/B testing and CRO analysis, increasing user engagement by leveraging tools such as Google Analytics for insights.
- **Deployment Connections:** Leverage CI/CD pipelines to improve release reliability, troubleshoot production issues, and maintain cross-browser and cross-platform stability.
- **Cross-Functional Collaboration:** Partner with designers, developers, and shareholders to streamline workflows and deliver accessible, user-friendly interfaces.
- **AI Assisted Coding Tools:** Use AI and agentic development tools such as Windsurf, Claude, and Github CoPilot to accelerate implementation cycles, reduce rework, and improve delivery timelines across complex frontend initiatives.

Senior Frontend Developer | YourWebPro

Jan 2019 - July 2021

YourWebPro was a rapidly growing startup delivering website and digital marketing solutions for home improvement contractors. As a Senior Frontend Developer, led frontend projects that improved user engagement, performance, and team workflows.

- **User-Centric Frontend Development:** Designed and implemented intuitive interfaces that increased user engagement by 15%.
- **Tooling & Workflow Improvements:** Introduced development tools and components that reduced build time by 25% and enhanced long-term maintainability.
- **Project Planning & Accountability:** Scoped, estimated, and managed frontend development efforts, consistently meeting project timelines and quality standards.
- **Performance Optimization:** Applied modern frameworks and best practices to boost system performance by 25%.
- **Knowledge Sharing & Documentation:** Contributed to internal resources through clear documentation, code samples, and team training.
- **Team Leadership & Project Management:** Led a team of two developers to deliver up to five websites daily, ensuring quality and on-time completion.
- **Cross-Functional Communication:** Served as technical liaison between frontend and backend teams, reducing bottlenecks by 30%.

Projects and Other Experience

WordPress Contract Developer | Black Dog Digital

- **WordPress Development:** Developed and maintained 10+ custom WordPress plugins, Gutenberg blocks, custom post types, taxonomies, and ACF fields to enhance client content management and site functionality.
- **API Integrations:** Integrated third-party APIs and resolved critical WordPress issues, improving site stability and reducing downtime through ongoing maintenance and updates.
- **Workflow and Version Control:** Streamlined development workflows using Git version control and provided training to clients and internal teams on WordPress best practices.

Dessert Ordering App | Project

- **React Development:** Built a dessert ordering app to strengthen React skills through hands-on project experience.
- **Interactive Features:** Implemented functionality to add and delete order quantities and dynamically update the cart total.
- **Order Processing:** Created a dummy order placement system to simulate a complete user purchase flow.

Education

University of Denver

Certificate in Full Stack Development (Aug 2018 - Jan 2019)

Southwestern Oklahoma State University

Bachelor of Business Administration (2007 - 2011)
